

Medical Discoveries

Materials Needed

- ✓ Computer / Internet (if BYOT applies, students have their own)
- ✓ Paper
- ✓ Pen or pencil

Students will research the Internet and come up with 5 new medical discoveries/breakthroughs, which have occurred within the last year (2014-present).

- For each discovery/breakthrough, provide the following in paragraph form:
 - What is it? What does it do?
 - Who is given credit for it?
 - Who will it help or benefit?
- Write a 150-200 word essay on the following topic:
 - If you could discover anything within the healthcare profession, what would it be and why?
